UX & UI Design
Responsive Design
Project Management
Technical Support
Client Management
Marketing & SEO
Problem Solving
Agile Methodologies
API Intergration
Version Control (Git)

From the moment I turned my design into working code, I knew web development was the perfect blend of creativity and problem solving that I enjoy. Adept at building full-stack applications, including using React, Vue and Angular, I focus on pairing seamless user experiences with functional and maintainable structures. With a proven ability to lead projects and produce high-quality digital content.

Portfolio Projects

Social Media App
Vue, .NET Core, SQL
C#, JavaScript, Tailwind
Developed features such as posting, commenting and sharing with AJAX requests. Includes account management with JWT authentication.

Clothing Brand
MEAN Stack
MongoDB, Entity Framework, Angular, Node.js, TypeScript, Bootstrap
Implements MongoDB filtering & searching for products with cart functionality.

Travel Website
React, .NET Core
JSON, C#, TypeScript, Tailwind
Handles JSON data deserialisation, static files and local storage with robust error handling and responsive design.
